

SUMIT KUMAR SINGH

Technical Program Manager | Mobile Delivery & Platform Leadership

Pune, India 411057 | +91 9870778070 | sumit.kr.singh14@gmail.com | Portfolio: [Sumit Kumar Singh](#)

PROFESSIONAL SUMMARY

Technical Program Manager with 16+ years leading complex, multi-team mobile and platform programs for global banking, fintech, insurance, and e-commerce enterprises. Proven track record orchestrating end-to-end delivery across iOS, Android, and React Native, translating business objectives into scalable technical roadmaps, and driving cross-functional teams (engineering, QA, architecture, security, legal, finance) to on-time, high-quality releases. Deep experience in program governance, budget and vendor management, client relationship management, and building repeatable delivery processes that cut cycle time and strengthen quality and compliance posture.

CORE COMPETENCIES

Program & Delivery: Program Governance & OKRs, End-to-End Software Delivery, Agile/Scrum, Risk & Financial Tracking, Vendor & Stakeholder Management

Technical: iOS, Android, React Native, Hybrid Apps, Swift, Kotlin, Java, Objective-C, JavaScript, RESTful APIs, Node.js, MVC/MVP/MVVM/VIPER

Leadership: Distributed Team Leadership, Mentorship & Performance Management, Client Relationship Management, Executive Communication

Domain: Fintech, Banking, Insurance, E-commerce, Healthcare, Retail

PROFESSIONAL EXPERIENCE

Technical Manager | Xoriant Corporation Pvt Ltd — Pune, India | June 2024 – Present

- Own program-level delivery for a leading service provider, running parallel initiatives — a UK fintech platform and a US retail mobile app — as the accountable Technical Project Manager for both.
- Directed end-to-end technical and functional delivery across multiple high-visibility programs, setting delivery governance, milestone tracking, and escalation paths.
- Led distributed developer teams across iOS, Android, and React Native to consistently ship high-quality releases on schedule.
- Serve as primary client point of contact, driving alignment on scope and priorities and enabling faster, better-informed decisions.
- Optimized resource planning and workload balancing across teams, resolving conflicts proactively to protect delivery timelines.
- Own effort estimation, financial tracking, and program budgets, keeping initiatives on scope and schedule.

Senior Manager | Capgemini Technology Services India Ltd — Pune, India | Oct 2013 – June 2024

- Led technical and managerial delivery of mobile application programs for banking and insurance clients, owning outcomes from solution design through production release.
- Directed development of iOS, Android, and React Native solutions, partnering with architecture and QA to ensure performance, security, and scalability.
- Ran multiple concurrent projects under Agile/Scrum, consistently meeting deadlines while exceeding client expectations on quality.
- Built and maintained stakeholder communication cadences (status reporting, steering reviews) that kept clients informed and issues resolved early.
- Grew from Senior Software Engineer into program leadership over an 11-year tenure, taking on progressively larger client accounts and team footprints — see Key Projects below.

Senior Mobile Application Developer (Senior Software Engineer) | iGate Global Solutions — Navi Mumbai, India | Jan 2011 – Sep 2013

- Built high-quality native iOS applications across Banking, Insurance, and other enterprise domains, translating varied client requirements into polished, user-friendly mobile experiences.

- Adapted design and development approach to each domain's unique compliance, security, and UX needs, delivering consistent quality across a diverse client portfolio.
- Collaborated with cross-functional teams — design, QA, and backend — to ensure smooth end-to-end delivery from requirements through release.
- Owned testing and debugging efforts to ensure high performance, stability, and a seamless user experience across releases.
- Delivered consistently against Agile timelines across concurrent projects, meeting deadlines while exceeding client expectations on quality.
- Participated in code reviews and knowledge-sharing sessions, raising code quality and long-term maintainability across the team.

Senior Mobile Developer (Programmer Analyst) | Mobicule Technology Pvt Ltd — Mumbai, India | June 2010 – Jan 2011

- Designed, developed, and deployed user-friendly native mobile applications for enterprise clients, owning features end to end from requirements through release.
- Partnered cross-functionally with product, QA, and backend teams to ensure seamless integration, functionality, and a consistent user experience across releases.
- Took the lead on testing and debugging efforts, identifying and resolving performance bottlenecks to strengthen application reliability.
- Troubleshoot and resolved production issues under tight timelines, minimizing downtime and impact to end users.
- Mentored junior developers on coding standards and mobile best practices, and contributed to code reviews that raised overall code quality.
- Worked directly with clients to clarify requirements and translate business needs into technical specifications for the development team.

KEY PROJECTS & CLIENT ENGAGEMENTS

Program Manager (CX), API Guardrails | NiCE Interactive Solutions

- Led the enterprise-wide API Guardrails program, standardizing API design, security, and lifecycle processes across engineering teams.
- Implemented automated API governance and security checks, cutting review cycles by 30–50%.
- Built the organization's first API monetization model, covering pricing, metering, and billing workflows.
- Introduced API scorecards to raise design quality, documentation, and compliance across teams.
- Drove cross-functional delivery spanning Architecture, Engineering, Security, Legal, and Finance, and established unified workflows for publishing, versioning, and retirement.
- Improved developer experience through better onboarding, documentation, and sandbox environments, and shipped usage-analytics dashboards to support adoption and monetization decisions.
- Owned program governance — OKRs, risk tracking, reporting, and stakeholder alignment — while leading continuous-improvement efforts that reduced defects and strengthened API security posture.

Technical Project Manager | Johnson Controls

- Led end-to-end technical and functional delivery of a US-based retail mobile application, ensuring timely, high-quality outcomes.
- Owned client communication and cross-functional technical teams, filling key technical roles and overseeing project financials.
- Acted as the primary liaison between business and technology stakeholders to align objectives and manage delivery schedules.
- Proposed and implemented technical process improvements that optimized resource utilization and lifted overall project efficiency.
- Directed integration of new technology solutions, producing measurable gains in operational productivity.
- Coordinated iOS, Android, and QA resources to keep development and testing workflows seamless.

Technical Project Manager | OneHub Mobile — Catalent Pharma

- Led end-to-end technical and functional delivery of a US-based retail mobile application, ensuring timely, high-quality outcomes.

- Contributed during the RFP phase by supporting technical solutioning, effort estimation, delivery planning, and proposal inputs.
- Maintained strong client communication, managed cross-functional technical teams, fulfilled key technical responsibilities, and oversaw project financials.
- Served as the bridge between business and technology stakeholders to align objectives, manage delivery schedules, and resolve priority conflicts.
- Resolved critical technical and design challenges by driving root-cause analysis, solution reviews, and timely decision-making.
- Implemented technical process improvements to optimize resource utilization, improve project efficiency, and streamline iOS, Android, and QA workflows.

Technical Project Manager | *Nomo Fintech*

- Owned technical and functional delivery of a UK-based fintech mobile platform end to end.
- Managed the technical team and finances while maintaining active, ongoing client communication.
- Liaised between business and technology units to set and manage application delivery schedules.
- Drove technical process improvements that optimized resource use and implementation of new technology, increasing efficiency.
- Managed delivery across React Native, Node.js, automation, and Salesforce resources.

Technical Architect | *CITIBank, NA*

- Led a digital mobile project across iOS, Android, React Native, and AngularJS platforms.
- Owned solution design and architecture management end to end, alongside client relationship management and technical delivery oversight.
- Ran project technical reviews and requirement analysis, coordinating development activity across iOS, Android, and React Native workstreams.

Lead Mobile Applications | *The Cooperative Bank, UK*

- Led a digital transformation program migrating an existing Kony implementation to fully native iOS and Android apps built on Swift and Kotlin.
- Owned technical delivery management, solution design, and requirements definition for the transformation.
- Established a Mobile Center of Excellence (CoE) to standardize practices and manage development activities and code delivery.

CERTIFICATIONS

- AI Fluency: Framework & Foundations — Anthropic
- Claude Platform 101 — Anthropic
- SAgE (Scaled Agile Framework) Overview — Udemy, Aug 2026

EDUCATION

Master of Computer Applications | *Jul 2007 – Jun 2010*

University of Mumbai — Specialization in Computer Applications

- GPA: 7.2 | Awarded the Sir Ratan Tata Trust Scholarship for academic excellence
